CLARITYCASTLE EDUCATION

Collab Pod

A four-person education pod for group study, tutoring and collaboration in schools, colleges and libraries.

STARTING AT

$10,000

One table and four chairs included. Delivery, installation, options and customization are quoted separately.

BASE MODEL	CAPACITY	FOOTPRINT
Base XL	Up to four	Confirmed for selected configuration

Product purpose

The Collab Pod gives small groups a dedicated place to speak, share a screen and work together while nearby library and learning areas continue to support quiet study. It is built on the ClarityCastle Base XL platform and configured for education environments.

Primary use cases

- Group study and project work
- In-person tutoring and mentoring
- Hybrid classes and collaboration
- Faculty and staff meetings
- Presentations, reviews and recorded group work

Recommended locations

- Public and academic libraries
- School learning commons
- Student centers and academic buildings
- Tutoring, advising and career centers

Standard education configuration

- One collaboration table and four chairs
- AC power plus USB-A and USB-C charging
- Adjustable LED lighting
- Active ventilation
- Occupancy indicator
- Cable-management provisions
- Acoustic PET interior panels
- Laminated glass and sealed framing
- Durable interior flooring

Configured for the project

- Table shape and seating finish
- Interior and exterior colors
- Monitor mounting and reinforced backing
- Whiteboard placement
- Privacy film and school branding
- Power layout, signage and accessibility planning

Options, Installation and Pricing

Optional customization

- Wall-mounted monitor bracket
- Writable wall panel or whiteboard
- School colors and branded graphics
- Additional privacy-film coverage
- Reservation or pod-identification signage
- Alternative table and seating finishes
- Custom interior and exterior finishes
- Data connection planning

Designed for

- Library directors
- School and university procurement teams
- Facilities departments
- Academic technology teams
- Student affairs and tutoring programs
- School and campus administrators

Installation and support

The modular pod is assembled inside the institution with less disruption than constructing a traditional permanent room. Production lead time is generally 10 to 14 weeks. Larger pods generally require one to two days for installation, depending on delivery access, site conditions and configuration. Delivery cost, installation requirements and scheduling are confirmed during quotation. Warranty coverage includes a one-year full warranty and a ten-year limited structural warranty.

Accessibility planning

Circulation space, entry configuration, interior clearances and intended use are reviewed project by project. Final compliance depends on the selected configuration, installation site and applicable requirements.

Sound performance

The Collab Pod uses acoustic PET panels, laminated glass and sealed framing to help reduce sound transfer and surrounding distractions. It is sound-reducing, not soundproof. Actual performance depends on placement, the surrounding room and installation conditions.

Pricing

Starting at $10,000, including one table and four chairs. Delivery, installation, options and customization are quoted separately. Final specifications and pricing for the ordered configuration are included with the project quote.
