CLARITYCASTLE EDUCATION

Student Pod

A technology-ready space for focused study and virtual learning in libraries, schools and shared academic environments.

STARTING AT

$5,000

Delivery, installation, optional equipment and customization are quoted separately.

BASE MODEL	CAPACITY	DIMENSIONS
Solo Phone Booth	**One person**	**Approx. 2.9 W x 2.9 D x 7.5 H ft**

Product purpose

The Student Pod gives students a dedicated place for focused work and virtual learning without constructing a permanent room. It supports spoken and quiet activities inside libraries, learning commons and other shared spaces.

Primary use cases

- Focused individual study
- Virtual classes and Chromebook-based coursework
- Video calls and online tutoring
- College or job interviews
- Language practice and recorded presentations

Recommended locations

- School, university and public libraries
- Learning commons and student centers
- Academic buildings and career centers
- Residence halls and shared study areas

Standard education configuration

- Height-adjustable desk for students of different ages and sizes
- Chromebook-sized work surface
- Reinforced monitor backing for future installation
- Cable-management opening
- AC power plus USB-A and USB-C charging
- Stool and occupancy indicator
- Adjustable LED lighting and active ventilation
- Backpack hook
- Durable, easy-to-clean work surface
- Partial privacy frosting
- Acoustic interior panels and laminated glass

Options, Installation and Pricing

Optional customization

- Monitor mounting bracket
- School colors and branded graphics
- Reservation or pod-identification signage
- Alternative desk dimensions
- Additional privacy frosting
- Custom interior and exterior finishes

Designed for

- Library directors
- School and university procurement teams
- Facilities departments
- Student affairs and academic technology teams
- School administrators

Installation and support

The modular pod can be installed inside an existing facility without building a permanent room. Standard production lead time is approximately 10 to 14 weeks. Delivery cost, installation requirements and site conditions are confirmed during quotation.

Positioning

A technology-ready individual study space designed around the way students work today, with an adjustable desk, Chromebook support, integrated charging and the flexibility to add a monitor when needed.

Sound performance

The Student Pod uses recycled PET acoustic panels, laminated glass and sealed framing to help reduce sound transfer and surrounding distractions. It is sound-reducing, not completely soundproof. Actual performance depends on placement, the surrounding room and installation conditions.

Pricing

Starting at $5,000. Delivery, installation, optional equipment and customization are quoted separately. Final specifications for the ordered configuration are included with the project quote.
